

AHU service, maintenance and repair

We service, maintenance and repair systems.

We provide air filter changes on contractual basis or condition-based monitoring for extra filter life as well as energy surveys on the air handling units.

We also offer:

- System balancing
- Mechanical component replacements such as heating and cooling coils, damper replacements, fans, motors and associated parts
- Installation of new AHUs
- Refurbishment of systems such as floor replacements, filter frame replacements, diffuser replacements and AHU panels
- Installation of system upgrades such as 'plug' fans from belt driven systems.
