

Dust system service, maintenance and repair

We provide annual LEV testing to COSHH regulation 9, ensuring compliance.

We also offer:

- ◊ Dust filtration system installations
- ◊ Dust system maintenance such as a regular review of the filters and pressure gauges
- ◊ Duct inspections and cleaning
- ◊ Filter replacements
- ◊ Dust system component replacements such as controllers, pilot box, magnehelic gauge replacements, ducting modifications and replacement.

Motor and/or mechanical component replacement and dust system re-balances are also offered as part of our complete service portfolio.
